

SRG

Netting Systems

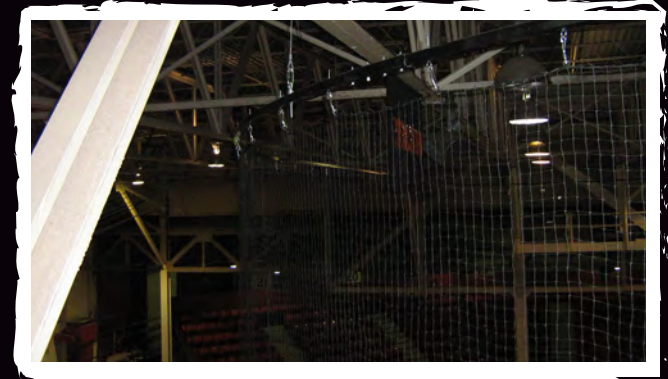

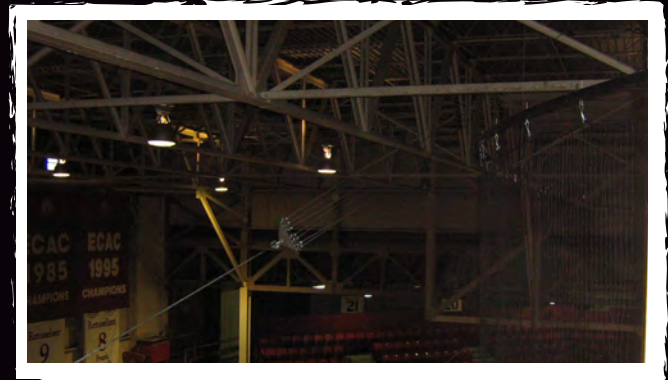

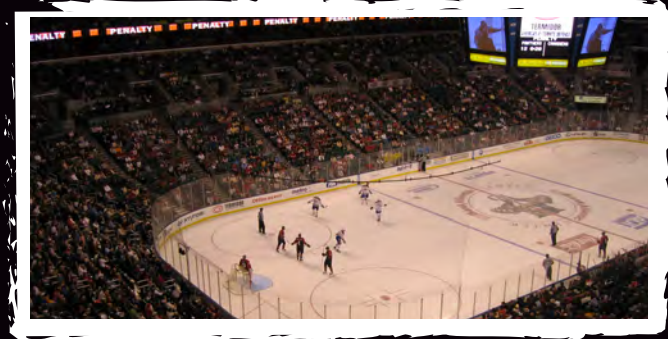

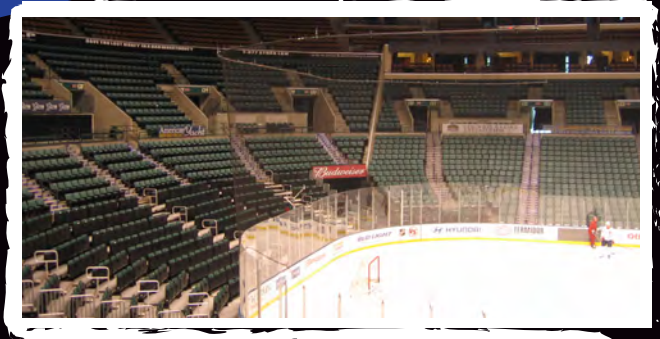

SportResourceGroup

Introducing...

Sport Resource Group Netting Systems – combining quality and value every step of the way. SRG's replacement netting and retractable netting systems were developed with the needs of the owner/operator and spectator in mind. Choose from NHL-approved black Kevlar netting, white or black nylon netting or clear monofilament netting

Advantages

- NHL-approved black Kevlar netting has a 1.2mm yarn thickness (compared with 2.1mm in traditional nets)
- Kevlar provides a fire-retardant coating
- Clear monofilament, white nylon and black nylon nets are perfect for budget-conscious venues
- All nets include roped top, bottom and sides
- SRG Retractable Netting Systems are perfect for venues which require fast changeovers
- Nets are suspended on 1.5" x 1.5" steel square tubing, curved to match the corner radius of the rink
- Power winches raise and lower the netting in as little as five minutes
- For installation or release, the net can be quickly and easily hooked or unhooked as required
- Hardware includes vertical hoist cables, steel tubing and pulleys
