## SportResourceGroup

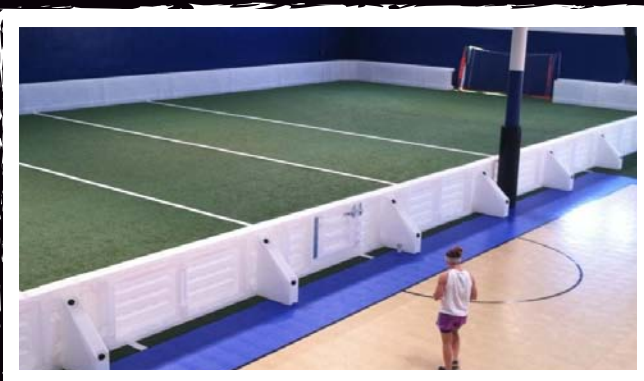

### Introducing...

Sport Resource Group's Soccer Containment Systems... Whether you are installing a permanent indoor soccer field or need a portable containment system for a youth game, Sport Resource Group has you covered. Choose from three of SRG's top of the line systems including SRG Indoor Series, ProWall® Rink System, and SRG's Portable Boundary System (PBS). Take your game to the next level with any of these systems. Don't sacrifice quality when selecting the best containment system for you and your players. Choose what the pros choose...Sport Resource Group.

### Advantages

- SRG Portable Boundary Systems – these portable panels are offered in 12" high, 22" high or 42" high open-cell, high density foam – or combine heights for higher containment on the ends and corners. Panels are covered with tear resistant vinyl. Choose from red, white, blue or black color.
- ProWall® Rink Systems – our patent-pending interlocking low linear density polyethylene dasher boards are the most popular solution for soccer facility owners who want versatility and durability for soccer of all ages. Portable, permanent, or semi-permanent, ProWall can be used wherever soccer is played. For use indoor or outdoor, you can also choose a custom color to really make a statement. Add acrylic, vinyl coated chain-link fencing, or SRG Netting as upper containment options to complete your top of the line soccer system.
- SRG Indoor Series – switch to a powder-coated welded aluminum frame and high density polyethylene (HDPE) facing and play on what the pros play on! Add seamless or supported tempered glass for great aesthetics and even better ball play.
